Customer Reviews

The insurance companies defend personal injury claims as a business and they know what they are doing and how they can reduce the value of your claim. This is likely your first involvement in the legal system and you may be naive about what is ahead of you. So, please read this book and be

prepared for battle, protect your rights and save your claim. Read this book today! This is important information for anyone involved in a personal injury claim. Karen and Michael lay out the hard facts of what an injured victim can expect from the insurance company defense teams, their lawyers, their doctors, and their investigators. This book is easy to read and full of valuable information. Anyone who reads this book can easily preserve or increase the value of their personal injury case by not making simple mistakes. How do I know? I am a veteran trial lawyer who has witnessed defense teams consistently shred innocent victims' claims who made simple mistakes. Such things as giving a recorded statement, being tricked into doing something by an investigator who videotapes it and uses it against them. Mistakes like not going to the doctors, or failing to tell the doctors about prior problems. This book will guide you through the litigation jungle and save you stress, frustration and financial losses. Be prepared by knowing what to do to protect yourself.

I'll be the first to admit that I know very little about the court system or lawsuits. I count myself lucky that I haven't ever had to deal with the court process. A book like this is invaluable to me so that I can know and understand my rights during a personal injury claim. This book lays out what to expect from all members of the court. How your attorney will help you while also teaching you how a defendant will try to protect themselves and win the case. This book is a great guide in preparing you want to expect if some type of injury should happen to you. Don't think you know everything and go charging in head first before talking to an attorney. Before you know it, you may have done and/or said things that make your case much harder to win. Do yourself a favor and grab a copy of this book for a short and easy read. Go in prepared so that you can understand what your attorney is saying and trying to do for you. Hopefully you never have to use your learning from this book and you live an injury free life. Just remember: YOUR injury affects YOUR life. Shouldn't YOU do everything in your power to get justice?

I was in a car accident in college in which a tractor trailer swerved into me while going down the highway. I ended up doing a U-turn at 60 mph, continued down the highway backwards, hit the concrete median with my back bumper which pushed me all the way across 3 lanes of traffic back to the other side of the highway where I finally stopped. The trucker tried to claim it was my fault. I wish I had read this book back then. I made so many mistakes. Two of them were: 1) Get the names and numbers of witnesses at the crash. Don't rely on police officers to do this. 2) Don't do the recorded interview regarding the crash until you talk to an attorney. During my accident, I was dazed and scared. I relied on other people around me to take care of things and didn't realize that from the

moment blame was placed on the trucker, the insurance company and the defendant were already preparing to fight me. This book offers valuable insight for preparing for a situation like this. Excellent, eye-opening read. -Kristin C

I bought this audible book and immediately listened to it from beginning to end. I was amazed at Karen's personal experience and the insight that she gained from it. Our life can change in just a moment, based on circumstances that have absolutely nothing to do with us. When Karen was injured she had no idea what to do, just like most anybody else. What I liked most about the book was how she related her personal experience into easy to follow instructions for anyone who finds themselves in a similar situation. The checklists and take aways are handy to have and contain great snippets of information. I am sure that there are plenty of how-to books out there on what to do when dealing with a personal injury lawsuit or fighting against an insurance company, but this one is different. This is one born of tragedy and poured out of a woman's heart who really cares for her fellow man.

Plaintiff 101 is a great reference for civil litigation! The checklists and takeaways, even Karen's own compelling account of her personal injury lawsuit, makes it a very practical guide, which simplifies grasping the legal process in general. Definitely a great buy!

I rarely give 5 stars to any book, but this one is exceptional, After my graduation I started working with a in-registered company and one evening while driving the car for my boss I got into an accident, my whole life stopped and I was searching for lawyers to help me with lawsuits and this books has helped me a lot in identifying my problems, a lot of people already talk to cops without any lawyer present or telling them what to speak, your words can make you or break you, I would recommend you read the book and get easy insights of court systems and lawsuits.
